

University of Findlay

College of Pharmacy

Introductory Pharmacy Practice Experience

Preceptor Manual

2020 – 2021

The University of Findlay College of Pharmacy Mission Statement

“To prepare pharmacists dedicated to improving patients' lives through practice, service, and research.”

VISION

The College of Pharmacy supports a vision of the future of the profession that includes the recognition by all persons of the value of pharmacist-provided comprehensive patient care. Pharmacy practice of the future will focus on direct patient care. Our faculty will pursue research and other scholarly activity designed to enhance the education of our students and to help define the therapies of the future and the pharmacist's role in monitoring therapy.

Our graduates will be leaders as we transition from a medication dispensing focus to prominence in the pharmacotherapy of practitioner diagnosed conditions. These new roles require that our graduates are trained with other health professionals to provide patient care services as a team. The strategies and goals in this plan are meant to support the mission statement and vision of the College of Pharmacy.

CONTEXT OF THE MISSION STATEMENT

The mission of the University of Findlay is to equip students for meaningful lives and productive careers. The core values identified in the University's 2005-2015 strategic plan included acknowledgment that our graduates are the primary contribution the university provides to local and national communities, a commitment to excellence in performance when compared to national standards, and a commitment to collaborative initiatives that improve the quality of and accessibility to the services which the University and its graduates provide. The College of Pharmacy's mission and vision are fully aligned with both the institution's mission and these core values. Its goals also mirror the mission of other health and human services programs in the University's Colleges of Education and Health Professions.

The College of Pharmacy endeavors to provide pharmacy education to students within a diverse, supportive, student-centered environment. The curriculum emphasizes the collaborative practice of pharmacy care and related healthcare disciplines, continuous professional development, critical thinking, evidence-based medicine, research, and service to the community.

In support of this mission, our faculty and students pursue scholarly activity to advance the care of patients, and our faculty members provide teaching and learning environments for our students to develop critical thinking skills. Our faculty members also participate in various service activities as part of their professional responsibilities. Through this capacity, they serve as role models for our students.

Welcome/Thank You Letter

Dear Preceptor,

Welcome to the 2020-2021 school year. We are grateful that you have agreed to precept our students this year and excited for their experience with you.

If you are a new preceptor this year, please take a moment to review the description and brief overview of our program beginning on page 5 of this manual. This manual is designed to be a resource for you as you precept our students. It includes checklists of experiences we would like each of our students to have while they are on rotations. Checklists are organized by the student's year in school (P3, P4, or P5) as well as semester (Summer/Fall and Winter/Spring). The following information can also be found in this manual:

- Our program policies, including our **absence/tardiness** policy, **academic dishonesty** policy, and **harassment/discrimination** policy among others, are explicitly outlined beginning on page 7 of this document. You are HIGHLY encouraged to report any violations of the above policies by calling or emailing the experiential office.
- A "**Student Introduction**" should be filled out by the student prior to starting a rotation with you. It is meant to help open the lines of communication between you and the student and to set up proper expectations for the experience. Please take a moment to ask the student for this on the first day and discuss it with them.
- Additionally, you'll find a "**Student Schedule**" document. You are encouraged to use this form to help ensure students are accountable to you for their hours during the semester.
- A section of this manual is entirely devoted to **preceptor resources**. It begins on page 44. This section contains several helpful preceptor resources including: a list of preceptor expectations, a cheat sheet for using RxPreceptor/CORE ELMS (Findlay's software system for tracking experiential students), details on obtaining preceptor training, a checklist for orienting students, a layout of the current pharmacy curriculum, and more.

As always, students want and appreciate your feedback on their performance, and it is a critical piece of their development as student-pharmacists. Please try to provide a **timely** evaluation of the student. Preferably, you would **go over their evaluation with them in person on the last day of the rotation**. As a reminder, any student you precept will also fill out an evaluation of you and the site on RxPreceptor/CORE ELMS. The students must complete the evaluation no later than 24 hours after the final day of the rotation. This evaluation will become available for your review on RxPreceptor/CORE ELMS as soon as you complete your evaluation of the student. For details on accessing the student's evaluation of you, see page 47 of this manual.

As always, we appreciate your continued dedication to educating future pharmacists. If you every have any concerns or question, please feel free to contact us.

Thank you,

The University of Findlay College of Pharmacy Office of Experiential Education

Introduction to the University of Findlay's Introductory Pharmacy Practice Experience (IPPE) Program

PROGRAM DESCRIPTION

The introductory pharmacy practice experiences are intended to introduce students to the practice of pharmacy, the healthcare system, and the role the pharmacist plays within the healthcare system. Students will gain pharmacy experience in, but not limited to, community and institutional pharmacy practices. Other pharmacist roles may include, but are not limited to: pharmacy managers, professors of pharmacy, clinical pharmacists, consultant pharmacists, pharmacy association directors, regional managers for chain pharmacies, pharmacists in pharmaceutical companies, and call pharmacists in mail-order pharmacy.

PROGRAM GOAL

The IPPE Program aims to provide practical, supervised, and intellectually-stimulating professional experiences which will enable students to develop a fundamental understanding of various areas of the healthcare system, how the pharmacist integrates into those settings, and to develop introductory problem-solving skills in the patient care environment during the P3 and P4 years and more advanced problem-solving skills during the P5 year.

PROGRAM OVERVIEW

	Corresponding Course	Practice Experience
P3 Year	PHAR 391 (Fall)	50 hours in a community pharmacy <i>5 hours of academic service-learning</i>
	PHAR 392 (Spring)	50 hours in a community pharmacy
P4 Year	PHAR 491 (Fall)	50 hours in an elective pharmacy setting
	PHAR 492 (Spring)	50 hours in an elective pharmacy setting <i>5 hours of academic service-learning</i>
P5 Year	PHAR 591 (Fall)	50 hours in an institutional pharmacy setting <i>5 hours of academic service-learning</i>
	PHAR 592 (Spring)	50 hours in an institutional pharmacy setting 10 hours of Advanced Cardiac Life Support training

- **Experiential Portfolio** – Each semester, the student will assemble and submit to the course instructor a professional portfolio using the MyCred program.
- **Evaluations** – The preceptor will evaluate the student throughout the rotation. Both formal and informal feedback are expected. Preceptor evaluations of the student will be used to identify and encourage improvement in areas where the student is not performing well. The student will also evaluate the preceptor and rotation site.
- **Reflections** – At the end of each semester, students will reflect on their IPPE rotations and academic service-learning experiences during class. The dates for these reflections will be outlined in the corresponding course syllabus.
- **Professional development** – Throughout the IPPE program, students will participate in career and professional development activities designed to help the students prepare for successful, meaningful, and productive careers. Each semester students will meet with a pharmacy mentor. Additional activities, speakers, and events will be outlined in the corresponding course syllabus.

IPPE PROGRAM OUTCOMES

Upon successful completion of the IPPE program and prior to beginning APPEs, students will have gained practical experiences that address each of the following educational outcomes outlined by the Center for the Advancement of Pharmacy Education (CAPE) and endorsed by the Accreditation Council for Pharmacy Education (ACPE):

Domain 1 – Foundational Knowledge

1.1. Learner (Learner) - Develop, integrate, and apply knowledge from the foundational sciences (i.e., pharmaceutical, social/behavioral/administrative, and clinical sciences) to evaluate the scientific literature, explain drug action, solve therapeutic problems, and advance population health and patient-centered care.

Domain 2 – Essentials for Practice and Care

2.1. Patient-centered care (Caregiver) - Provide patient-centered care as the medication expert (collect and interpret evidence, prioritize, formulate assessments and recommendations, implement, monitor and adjust plans, and document activities).

2.2. Medication use systems management (Manager) - Manage patient healthcare needs using human, financial, technological, and physical resources to optimize the safety and efficacy of medication use systems.

2.3. Health and wellness (Promoter) - Design prevention, intervention, and educational strategies for individuals and communities to manage chronic disease and improve health and wellness.

Domain 3 - Approach to Practice and Care

3.1. Problem Solving (Problem Solver) – Identify problems; explore and prioritize potential strategies; and design, implement, and evaluate a viable solution.

3.2. Educator (Educator) – Educate all audiences by determining the most effective and enduring ways to impart information and assess understanding.

3.5. Cultural sensitivity (Includer) - Recognize social determinants of health to diminish disparities and inequities in access to quality care.

3.6. Communication (Communicator) – Effectively communicate verbally and nonverbally when interacting with an individual, group, or organization.

Domain 4 – Personal and Professional Development

4.4. Professionalism (Professional) - Exhibit behaviors and values that are consistent with the trust given to the profession by patients, other healthcare providers, and society.

Experiential Program Policies

PROFESSIONAL CONDUCT

While completing any pharmacy experiences, students will adhere to the highest standards of professional conduct. Students are expected to uphold the strictest patient confidentiality standards and display a positive, self-motivated attitude. Students are expected to arrive on time and participate fully in all scheduled introductory practice experiences. In addition, students will be expected to dress in appropriate professional attire as outlined below. Students failing to comply with these standards should be immediately reported through RxPreceptor/CORE ELMS's "Incident Report" or via an email to the Assistant Director of Experiential Education. Depending on the situation, students may be removed from a site based on failure to comply with professional conduct policies. Additionally, a non-passing grade may be assigned to the student at the discretion of the preceptor and Director or Assistant Director of Experiential Education.

Absence/Tardiness Policy

- Students are **NOT** excused from classes to complete experiential hours.
- After a schedule for completion of IPPE hours has been established, the student is committed to that schedule and any deviation or request for alteration by the student will be considered an unexcused absence.
- Students who are dealing with heightened physical or mental health issues that impact their ability to fully participate in the learning experience must have medical documentation to continue in the rotation for their well-being and the patients they serve.
- **Emergency absence** – If the student must miss their rotation because of illness or an emergency situation, the student must complete the steps outlined below **AT A MINIMUM**. If a preceptor requires additional steps, those must also be completed.
 - Attempt to contact the preceptor via office phone and email **PRIOR TO** the time you are scheduled to report for your IPPE rotation. If the preceptor cannot be reached by phone, the student must leave a message with the details of the situation and a phone number where they can be reached.
 - Attempt to contact the Assistant Director of Experiential Education via phone and email **PRIOR TO** the time you are scheduled to report for your IPPE rotation. If the Assistant Director cannot be reached by phone, the student must leave a message with the details of the situation and a phone number where they can be reached.
 - The student should be prepared to provide documentation (doctor's notes, accident report, etc.) to the preceptor and a copy of the documentation to the Assistant Director of Experiential Education.
 - Students whose absences are a result of inpatient medical care must provide a medical release to the Assistant Director of Experiential Education prior to returning to the assigned rotation.
 - The student will be required to make up the missed hours at a new date/time agreed upon by the preceptor.
- **Unexcused absence** – If the student does not adhere to the pre-specified rotation schedule OR the student did not follow the proper procedure or provide appropriate documentation for an "emergency absence," this will be considered an unexcused absence.
 - The preceptor should file an incident report in RxPreceptor/CORE ELMS and/or contact the Assistant Director of Experiential Education if such absences occur.
 - Unexcused absences are **NOT** tolerated and jeopardize the student's successful completion of the program. Unexcused absences will result in the assignment of a failing grade or grade reduction in the corresponding experiential course.

- **Tardiness** – If the student arrives greater than 5 minutes past the expected and pre-determined start time for an experience, the student is considered tardy.
 - The preceptor should file an incident report in RxPreceptor/CORE ELMS and/or contact the Assistant Director of Experiential Education if tardiness occurs.
 - Three reports of tardiness are equivalent to one unexcused absence and may result in the assignment of a failing grade or grade reduction in the corresponding experiential course.

Professional Dress Code

- The following is a minimum expected dress code for the University of Findlay College of Pharmacy students. When an experiential site dress code is more inclusive, the site dress code must be followed.
 - Students must wear their white coat, which should be clean in appearance and ironed or pressed, along with their College of Pharmacy issued name badge for all introductory experience activities unless otherwise directed by the preceptor.
 - Fingernails – Nails must be kept clean and neat with their length to be no longer than ¼ inch beyond the end of the finger. Artificial nails are not permitted.
 - Piercings – No visible body piercings, with the exception of ear piercings, will be permitted.
 - Tattoos – No visible body tattoos. All tattoos potentially visible by patients or other caregivers shall be covered at all times.
 - Shoes – No open toed shoes will be permitted in patient care areas.
 - Clothing – Clothing should be professional and appropriate for the practice setting. Skirts and dresses must be at knee length. Skirts or dresses must fall below the hemline of the white lab coat.
 - Fragrances – No over-powering fragrances.
- If a preceptor, employee, or patient at a site where the student is working feels that any area of this professional dress code has been violated, the preceptor may choose to address the issue directly with the student, or they may file an incident report on RxPreceptor/CORE ELMS and the issue will be addressed by the Office of Experiential Education.

Social Media & Public Forum Policy

- Students are expected to exercise personal and professional responsibility whenever using social media, which includes not violating the trust of those with whom they are engaging. This includes patients, patient families, other students, sites, preceptors and the University. Any posting in any social media or public forum regarding encounters during experiential education, even if posted in a non-identifiable way, is strictly prohibited.

No Smoking Policy

- Pharmacy students shall not smoke during rotation hours, breaks, or on the premises of the facility/pharmacy. Student clothing should be free of smoke odor, as this can be offensive to patients and other care givers. A student identified breaking this policy is at risk of being removed from the site and failing the rotation.

Use of Handheld and Mobile Devices

- Students are responsible for determining the experiential site's policy on mobile phones and handheld devices for the purposes of drug information prior to or during the first day of a new experience.
- The personal use of mobile phones (personal calls, texting, emailing, or other personal business not related to IPPEs) is prohibited during any IPPE. Inappropriate use of mobile phones is considered unprofessional and may result in the assignment of a failing grade or grade reduction in the corresponding experiential course.

Patient Confidentiality

- The student will abide by HIPAA regulations and uphold the strictest patient confidentiality standards.
- The student is expected not to discuss patient information they have learned from their rotation site outside of their learning environment. Patient names should not be used in any oral or written presentations or assignments.
- Records containing protected health information are NOT to be removed from the facility. All records should be placed in the appropriate area as designated by the preceptor. Students may not remove records from designated areas without permission.
- Any violation of the above policy will result in immediate dismissal from the practice site and a failing grade will be assigned.

ACADEMIC DISHONESTY

- In attempt to maintain academic integrity, the College of Pharmacy has outlined a code of conduct (an Honor Code), which describes acceptable behavior for students in all its academic settings. This code has been developed using University and College standards. Full details of the University of Findlay College of Pharmacy's Honor code can be found in the Pharmacy Student Handbook or by following this link (page 15):
- <https://www.findlay.edu/intranet/colleges/pharmacy/Documents/University%20of%20Findlay%20College%20of%20Pharmacy%20Student%20Handbook%20-%202012-13-18.pdf>
- Per the College of Pharmacy's definition, academic dishonesty includes:
 - **Cheating:** Using or attempting to use unauthorized materials, information, notes, study aids or other devices, or obtaining unauthorized assistance from any source for work submitted as one's own individual efforts in any class, clinic, assignment, or examination.
 - **Plagiarism:** Representing orally or in writing, in any academic assignment or exercise, the words, ideas, or works of another as one's own without customary and proper acknowledgment of the source.
 - **Facilitating Academic Dishonesty:** Helping or attempting to help another person commit an act of academic dishonesty.
 - **Abuse of Academic Materials:** Destroying or making inaccessible academic resource materials.
 - **Stealing:** Taking, attempting to take, or withholding the property of another thereby permanently or temporarily depriving the owner of its use or possession.
 - **Lying:** Making any oral or written statement that the individual knows to be untrue.
- Academic dishonesty in any form will not be tolerated. Incidences of confirmed or suspected academic dishonesty should be reported to the Director and/or Assistant Director of Experiential Education immediately. Acts of academic dishonesty will result in immediate dismissal from the practice site and a failing grade. Students will then be referred to the College's Student Affairs Committee to continue the process of addressing the academic misconduct.

HARASSMENT AND DISCRIMINATION

The University of Findlay prohibits harassment and discrimination in any of its programs and activities, including those conducted in partnership with another institution. Harassment or discrimination based on sex, age, race, ethnicity, national origin, color, religion, gender identity, handicap/ability, sexual orientation, genetic information, veteran or military status and physical or mental disabilities is strictly prohibited.

Sexual harassment is defined as conduct on the basis of sex that satisfies one or more of the following: (i) an employee of the University conditioning the provision of an aid, benefit, or service of the University on an individual's participation in unwelcome sexual conduct; (ii) unwelcome conduct determined by a reasonable person to be so severe, pervasive, and objectively offensive that it effectively denies a person equal access to the recipient's

education program or activity, or (iii) sexual assault, dating violence, domestic violence, or stalking. Harassment on the basis of other protected traits may include any conduct which the submission to or rejection of: (i) is made either explicitly or implicitly a term or condition of the person's grade or evaluation in the program, (ii) is used as the basis for employment or educational decisions affecting an individual in the program, or (iii) creates an intimidating, hostile, or offensive working or educational environment within the program.

Specific definitions and examples are provided within the applicable policies below.

- **Mandatory Reporting of Sexual Harassment/Discrimination:** Allegations of sexual harassment or discrimination by or against a University of Findlay student **MUST** be reported to the University of Findlay Title IX Coordinator immediately. Allegations of harassment or discrimination against a University of Findlay student by someone at the preceptor's institution should also be reported to the preceptor institution in accordance with its institutional policies. The University of Findlay Title IX Policy: <https://www.findlay.edu/offices/student-affairs/title-ix/title-ix-policy>
- **Reporting of All Forms of Harassment/Discrimination:** Any allegations of harassment or discrimination that involve a University of Findlay student on experiential rotation may be reported to the University of Findlay Director of Equity and Title IX or to the Harassment Hotline. The University of Findlay Non-Discrimination and Anti-Harassment Policy: <http://catalog.findlay.edu/en/Archived-Current/Shared-Content/Student-Rights-and-Responsibilities-Statement/Student-Rights-and-Responsibilities-Statement/X-Non-Discrimination-Anti-Harassment-and-Hostile-Campus-Environment-Policy>

Individuals involved in making a report as indicated above are protected from retaliation. More information about those protections can be found in the policies listed above. Preceptors must assist the University of Findlay in providing adequate supportive measures to ensure University of Findlay students have continuing access to the program.

**Contact Information: University of Findlay Title IX Coordinator, Director for Equity and Title IX
Skylar Mettert, (419) 434-4733, metters@findlay.edu**

Office Location: Old Main 45, University of Findlay, 1000 N. Main Street, Findlay, OH 45840
University of Findlay Harassment Hotline: (419) 434-6777

EMPLOYMENT AND COMPENSATION

- IPPEs will not be scheduled around employment and students should **NEVER** leave a rotation early or miss a requirement due to outside employment.
- Students may **NOT** be compensated for experiences submitted for academic credit.
- Students may not complete IPPE hours at a site where he or she has worked for compensation or at a site where he or she currently works.
- Students **MAY NOT** complete experiential hours prior to being linked with the preceptor in CORE/ELMS.

PRECEPTOR POLICIES

- An affiliation agreement and preceptor application form must be in place with each site and pharmacist, respectively, prior to the student starting an experience.
- All experiences must be completed with an approved College of Pharmacy preceptor.
- Students may **NOT** be precepted by a spouse, parent, grandparent or sibling.
- Students may choose no more than one preceptor per semester, unless prior approval is granted by the Director or Assistant Director of Experiential Education.
- Students may **NOT** complete more than 150 hours (3 semesters) of introductory experience at any one site or with any one preceptor.

EXPOSURE TO BLOODBORNE PATHOGENS

- If a student is exposed to bloodborne pathogens while on an experiential rotation, the University of Findlay College of Pharmacy has outlined a set of procedures to be followed. This information can be found in Appendix A of this document.

Introduction to Precepting University of Findlay IPPE Students

Dear Preceptor,

University of Findlay students are required to meet a set of learning objectives during each IPPE rotation. These objectives are designed to give them a well-rounded look at both community and institutional pharmacy. A checklist of activities has been created to help ensure that the students are able to meet each learning objective for the rotation. If there are items on the checklist that you will not be able to achieve at your site, feel free to come up with another, more creative way, to achieve the learning objective associated with that item, or you can have the student email me for an alternative assignment (burkart@findlay.edu).

The two pages following this document are a sample of the **Student Introduction** and **Student Schedule** documents. Your student should fill out the Student Introduction prior to arrival at your site, and they should present it to you on the first day. This is designed to help improve communication between you and your student. The student schedule is a tool to help you establish a concrete schedule with your student so you can hold them accountable for their hours. You do not have to use this document, but if you think it would be helpful, I encourage you to incorporate it into your rotation.

Following those documents, you will find the learning objectives and checklists for Findlay IPPE students broken down by year (P3, P4, or P5) and by course/semester (Fall vs. Spring). These checklists are a guide for a minimum experience. We highly encourage you to go above and beyond the checklist if there are additional experiences you would like our students to have.

If you have any questions or suggestions for how we can improve these checklists for future students, please do not hesitate to contact me (burkart@findlay.edu). We want to make the learning objectives and the checklists as realistic and well-rounded as possible.

Thank you,

Tim Burkart, PharmD, BCPS, BCGP, CDP
Assistant Director of Experiential Education

Student Introduction – Summer/Fall

Directions: This form is designed to open the lines of communication between the preceptor and the student in order to facilitate the best possible learning experience. The student must prepare this form prior to the start of their IPPE rotation and present it, along with the Student Scheduling document, and the appropriate Competencies Checklist to the preceptor on the first day of the rotation (*this form does NOT need to be turned in to the Experiential Office*).

Student Name: _____

Student Email: _____

Student Phone Number: _____

If this is a new IPPE site and/or a new preceptor you haven't worked with in the past, please describe your pharmacy work history (if you have not worked in a pharmacy before, please indicate that).

What are the current courses you're taking, and what topics are you covering right now (very brief summary)? If it is summer, what courses did you complete last semester?

My personal, specific, measurable goals for this introductory pharmacy practice experience are:

1.

2.

Student Schedule – Summer/Fall

Directions: On (or before) the first day of the rotation, please establish a schedule for completion of the remaining IPPE hours. This schedule does not need to be turned in, but is meant to serve as an official commitment on the part of the student. It may be useful for both the preceptor and the student to have a copy of this document. *Remember, IPPE hours **cannot** be counted if performed prior to linking with a preceptor in CORE/ELMS.

Date	Time	Number of Hours
<i>Ex: 10/20</i>	<i>5:00-8:00 pm</i>	<i>3 hours</i>
	Total # of Hours:	

I agree to this schedule, and I understand that any deviation from this schedule will be considered an unexcused absence.

Student Signature _____ Date _____

If there is an emergency, I will need a way to contact my preceptor. My preceptor prefers to be contacted at this phone number _____ and at this email address _____.

Student Introduction – Winter/Spring

Directions: This form is designed to open the lines of communication between the preceptor and the student in order to facilitate the best possible learning experience. The student must prepare this form prior to the start of their IPPE rotation and present it, along with the Student Scheduling document, and the appropriate Competencies Checklist to the preceptor on the first day of the rotation (*this form does NOT need to be turned in to the Experiential Office*).

Student Name: _____

Student Email: _____

Student Phone Number: _____

If this is a new IPPE site and/or a new preceptor you haven't worked with in the past, please describe your pharmacy work history (if you have not worked in a pharmacy before, please indicate that).

What are the current courses you're taking and what topics are you covering right now (very brief summary)? If it is summer, what courses did you complete last semester?

My personal, specific, measurable goals for this introductory pharmacy practice experience are:

1.

2.

Student Schedule – Winter/Spring

Directions: On (or before) the first day of the rotation, please establish a schedule for completion of the remaining IPPE hours. This schedule does not need to be turned in, but is meant to serve as an official commitment on the part of the student. It may be useful for both the preceptor and the student to have a copy of this document. *Remember, IPPE hours **cannot** be counted if performed prior to linking with a preceptor in CORE/ELMS.

Date	Time	Number of Hours
<i>Ex: 10/20</i>	<i>5:00-8:00 pm</i>	<i>3 hours</i>
Total # of Hours:		

I agree to this schedule, and I understand that any deviation from this schedule will be considered an unexcused absence.

Student Signature _____ Date _____

If there is an emergency, I will need a way to contact my preceptor. My preceptor prefers to be contacted at this phone number _____ and at this email address _____.

P3 Students
Introductory Practice Experience
PHAR 391 and PHAR 392

P3 Learning Objectives (PHAR 391 and PHAR 392)

Upon completion of the P3 experiences with pharmacist preceptors in the **community pharmacy setting** and completion of academic service-learning the student should be able to:

1. Demonstrate the basic technical functions of prescription processing (Outcome 2.2)
2. Identify policies used to improve patient safety (Outcome 2.2)
3. Demonstrate the ability to collect complete, accurate patient information for the purpose of prescription processing (Outcome 2.1)
4. Describe the responsibilities of a pharmacist when handling controlled substances in an outpatient setting (Outcome 2.2)
5. Discuss the role of the pharmacist in the healthcare system (Outcome 4.4)
6. Discuss the activities and responsibilities of all pharmacy team members in the pharmacy (Outcome 4.4)
7. Demonstrate ethical, professional behavior at all times and describe their importance (Outcome 4.4)
8. Describe how culture, language, and health literacy may impact the delivery of healthcare services (Outcome 3.5)
9. Provide effective medication information to patients regarding prescription and non-prescription therapies (Outcome 2.1, 3.6)
10. Demonstrate fundamental drug information skills (Outcome 1.1)

The following objectives are met in the classroom, academic service-learning, and/or for the students' portfolios. The objectives may be observed in the experiential setting but are not always part of the preceptor's assessment/evaluation of the student.

1. Describe how healthcare informatics is utilized by the site to improve efficiency (Outcome 2.2)
2. Identify brand names, generic names, and the therapeutic class for common medications (Top 200) (Outcome 1.1)
3. Demonstrate effective communication skills (verbal, non-verbal, and written) at an appropriate level for patients, caregivers, and healthcare providers (Outcome 3.6)
4. Discuss the role of third parties in the provision of drug therapy in the community setting (Outcome 2.2)
5. Prepare a project or presentation and/or participate in activity related to the promotion of health and wellness for a local non-profit organization, nursing home, or school. (Outcomes 2.3, 3.2, and 3.6)
6. Interact with a unique or diverse patient population. (Outcome 3.5)
7. Discuss how a patient's age, culture, nationality, religion, language, ethnicity, or social group may impact their health beliefs or access to care. (Outcome 3.5)
8. Discuss how serving persons with diverse backgrounds may impact one's cultural competence (awareness, attitude, knowledge, and skills). (Outcome 3.5)

The University of Findlay College of Pharmacy P3 Year – Summer/Fall (PHAR 391) Competency Checklist

On the following pages, you will find a checklist of tasks that will help you to evaluate the student's ability to achieve the learning objectives on the previous page. These tasks are aligned with the CAPE outcomes from page 6 and are also linked to entrustable professional activities (EPAs). Use this checklist when completing a final evaluation of the student to assess not only their knowledge but your level of trust in them performing the activities. The definition of the trust levels is included in the four-point scale below and on the Experiential Competency Requirements & Student Evaluation found on CORE/ELMS.

- The student is responsible for attempting to complete ALL items listed.
- If you feel that the student may not be able to complete some of the items on the checklist, please contact the Assistant Director of Experiential Education immediately to discuss alternative options.
- Items that have an asterisk (*) next to them indicate assignments that complement items on the checklist. The student must complete these assignments at home and upload them to their professional portfolio. You may or may not choose to review these materials.

Upon conclusion of this student's rotation, you will be asked to evaluate and document achievement of the learning objectives in **RxPreceptor/CORE ELMS**. Therefore, either you or your designee must personally observe the student completing the tasks in order to adequately assess the student's competence.

You will be asked to evaluate the student using the following four-point scale:

1 = Unsatisfactory Performance (Low Trust: The student required complete guidance or was unprepared; the preceptor had to complete most of the task.)

Student does not meet requirements. Student is unable to complete the tasks despite guidance and prompting.

2 = Needs Improvement (Minimal/Moderate Trust: The student was able to perform some tasks but required repeated directions.)

Student meets some minimum requirements. Student frequently requires guidance and/or prompting to complete tasks.

3 = Progressing Satisfactorily (High Trust: The student demonstrated some independence, only requiring intermittent prompting.)

Student consistently meets requirements. Student completes basic and some complex tasks independently with minimal or no guidance and/or prompting.

4 = Exceeds Expectations (Complete Trust: The student functioned fairly independently and only needed assistance with nuances or complex situations.)

Student exceeds requirements. Student consistently and independently completes all basic and complex tasks going beyond what is required.

If you have any questions or concerns please contact the Assistant Director of Experiential Education by phone: (419) 434-5783 or e-mail: burkart@findlay.edu.

P3 YEAR – SUMMER/FALL (PHAR 391) COMPETENCY CHECKLIST

1. **Demonstrate the basic technical functions of prescription processing** (Outcome 2.2; PHAR 350)
 - Student accurately enters a new prescription or drug order ten (10) consecutive times
 - Student ensures that the correct medication is placed into a prescription vial ten (10) consecutive times
 - Student appropriately processes and dispenses a prescription refill in accordance to the site procedure
 - Student describes all of the legal requirements of a prescription label
 - Student describes the process of filing and retrieving hardcopy and/or electronic patient drug records

 2. **Identify policies used to improve patient safety** (Outcome 2.2; PHAR 350)
 - Student describes policies at the site that are meant to identify and resolve errors in the dispensing process
 - Student discusses non-safety cap dispensing policy at the site

 3. **Demonstrate the ability to collect complete, accurate patient information for the purpose of prescription processing** (Outcome 2.1; PHAR 251)
 - Student interviews at least four (4) patients in order to obtain the necessary information to properly fill a new prescription including:
 - Demographic information
 - Medication history
 - Allergies
 - Insurance information

 4. **Describe the responsibilities of a pharmacist when handling controlled substances in an outpatient setting** (Outcome 2.4; PHAR 251, 350)
 - Student describes the differences between CI, CII, CIII, CIV and CV classifications
 - Student describes the rationale for a drug gaining a controlled substance designation

 5. **Discuss the role of the pharmacist in the healthcare system** (Outcome 4.4; PHAR 150, 251, 350)
 - Student describes the role of the pharmacist in a healthcare system
 - Student observes pharmacist making an intervention
 - Student describes at least 10 different career options for a pharmacist
 - Student identifies at least 10 different skills that a pharmacist utilizes
 - Student determines what preparation is necessary to function at practice site

 6. **Discuss the activities and responsibilities of all pharmacy team members in the pharmacy** (Outcome 4.4; PHAR 251, 350)
 - Student describes the training and background of pharmacy technicians
 - Student identifies the responsibilities of each pharmacy team member (pharmacist, interns, technicians, clerks, and others) in regard to the following tasks:
 - Order Entry
 - Final verification of prescriptions
 - Transferring prescriptions and taking copies
 - Handling of controlled substances
 - Inventory management
 - Offer to counsel patients
 - Counseling patients
 - Billing/payment issues
 - Scheduling of pharmacists/technicians
 - Customer/patient relations
 - Error management
- *ASSIGNMENT:** Use a grid or table to describe each team member's responsibilities

7. **Demonstrate ethical, professional behavior at all times and describe their importance** (Outcome 4.4; PHAR 251, 350)
 - Student identifies policies at the site that are meant to ensure compliance with HIPAA
 - Student and preceptor discuss professionalism, and the student defines what it means to be “professional”
 - Student recognizes the importance of professionalism when observing a pharmacist interacting with physicians, patients, and colleagues
 - Student always demonstrates professionalism when communicating with physicians, patients and colleagues

8. **Describe how culture, language, and health literacy may impact the delivery of healthcare services** (Outcome 3.5; PHAR 251)
 - Student identifies one minority, immigrant, refugee or underserved population at the site
 - Student discusses the possible barriers to effective delivery of healthcare to that population

***ASSIGNMENT:** Student identifies any potential health disparities for this population and writes a one-page paper discussing how one’s culture may impact health disparity citing specific examples

9. **Provide effective medication information to patients regarding prescription and non-prescription therapies** (Outcome 2.1, 3.6; PHAR 350)
 - Student describes the role of the pharmacist in counseling patients on medications and observes the pharmacist counsel a patient on at least one (1) prescription medication and one (1) over-the-counter medication
 - Student performs at least three (3) practice counseling session with pharmacy personnel and the preceptor offers constructive feedback

10. **Demonstrate fundamental drug information skills** (Outcome 1.1; PHAR 251, 350)
 - Student identifies at least three (3) drug information sources available to the practice site

***ASSIGNMENT:** Student utilizes one or more of the resources available at the site to describe the mechanism, severity, likelihood and consequences of two (2) drug interactions encountered during the experience (a total of 4 drugs, 2 pairs)

***ASSIGNMENT:** Student types a list of five (5) non-controlled prescription medications and five (5) controlled substances (generic and trade name) that were seen during experience. For each medication list the therapeutic class and most common side effects

The University of Findlay College of Pharmacy P3 Year – Winter/Spring (PHAR 392) Competency Checklist

On the following pages, you will find a checklist of tasks that will help you to evaluate the student's ability to achieve the learning objectives on the previous page. These tasks are aligned with the CAPE outcomes from page 6 and are also linked to entrustable professional activities (EPAs). Use this checklist when completing a final evaluation of the student to assess not only their knowledge but your level of trust in them performing the activities. The definition of the trust levels is included in the four-point scale below and on the Experiential Competency Requirements & Student Evaluation found on CORE/ELMS.

- The student is responsible for attempting to complete ALL items listed.
- If you feel that the student may not be able to complete some of the items on the checklist, please contact the Assistant Director of Experiential Education immediately to discuss alternative options.
- Items that have an asterisk (*) next to them indicate assignments that complement items on the checklist. The student must complete these assignments at home and upload them to their professional portfolio. You may or may not choose to review these materials.

Upon conclusion of this student's rotation, you will be asked to evaluate and document achievement of the learning objectives in **RxPreceptor/CORE ELMS**. Therefore, either you or your designee must personally observe the student completing the tasks in order to adequately assess the student's competence.

You will be asked to evaluate the student using the following four-point scale:

1 = Unsatisfactory Performance (Low Trust: The student required complete guidance or was unprepared; the preceptor had to complete most of the task.)

Student does not meet requirements. Student is unable to complete the tasks despite guidance and prompting.

2 = Needs Improvement (Minimal/Moderate Trust: The student was able to perform some tasks but required repeated directions.)

Student meets some minimum requirements. Student frequently requires guidance and/or prompting to complete tasks.

3 = Progressing Satisfactorily (High Trust: The student demonstrated some independence, only requiring intermittent prompting.)

Student consistently meets requirements. Student completes basic and some complex tasks independently with minimal or no guidance and/or prompting.

4 = Exceeds Expectations (Complete Trust: The student functioned fairly independently and only needed assistance with nuances or complex situations.)

Student exceeds requirements. Student consistently and independently completes all basic and complex tasks going beyond what is required.

If you have any questions or concerns please contact the Assistant Director of Experiential Education by phone at (419) 434-5783 or email at burkart@findlay.edu.

P3 YEAR – WINTER/SPRING (PHAR 392) COMPETENCY CHECKLIST

- 1. Demonstrate the basic technical functions of prescription processing** (Outcome 2.2; PHAR 251, 350, 351)
 - Student receives and accurately transcribes five (5) consecutive prescriptions via voicemail
 - Student gives three (3) copies of a prescription to another pharmacy
 - Student receives and accurately transcribes three (3) consecutive prescriptions via live phone call
 - Student accurately labels six (6) consecutive medications with appropriate auxiliary labels

- 2. Identify policies used to improve patient safety** (Outcome 2.2; PHAR 350)
 - Student identifies (5) pairs of look-alike/sound-alike medications dispensed at the site
 - Student describes specific strategies at the site to prevent errors related to look-alike/sound-alike drugs

- 3. Describe how healthcare informatics is utilized by the site to improve efficiency** (Outcome 2.2)
 - Student identifies the methods by which pharmacy staff are trained in the use of one or more of the following at the site:
 - i. Dispensing robot or other automated dispensing process
 - ii. Automated compounding device
 - iii. Medication cabinet (e.g. Accudose, Pyxis)
 - iv. Inventory management systems
 - v. Electronic prescribing systems
 - Student performs a quality assurance check on one of the items listed above or identifies how to generate and utilize reports

- 4. Identify brand names, generic names and the therapeutic class for common medications (Top 200)** (Outcome 1.1; PHAR 251, 350, 351)
 - Student correctly identifies twenty-five (25) non-controlled substances by trade and generic name
 - Student correctly identifies ten (10) controlled substances by trade and generic names
 - Student correctly identifies ten (10) over-the-counter medications by trade and generic name and student and preceptor discuss the medications' indications, exclusions for use, and major counseling points

***ASSIGNMENT** Student types a list of ten (10) over-the-counter medications (generic and common trade names) that were seen during the experience. For each OTC medication list the most common indications, mechanism of action, and major counseling points

- 5. Describe the responsibilities of a pharmacist when handling controlled substances in an outpatient setting** (Outcome 2.2; PHAR 251, 350)
 - Student correctly completes a DEA form for ordering controlled substances
 - Student explains the storage requirements for controlled substances
 - Student explains the process by which a patient may purchase a Schedule V Exempt Narcotic (e.g. codeine cough elixir)

- 6. Demonstrate ethical, professional behavior at all times and describe their importance** (Outcome 4.4; PHAR 251, 350)
 - Student describes what it means to act "ethically"
 - Student and preceptor discuss an ethical situation that the preceptor has encountered and the student reflects upon what they would do in the same situation
 - Student describes what it means to act "professionally"
 - Student demonstrates professionalism when communicating with physicians, patients and colleagues

- 7. Demonstrate effective communication skills (verbal, non-verbal, and written) at an appropriate level for patients, caregivers, and healthcare providers** (Outcome 3.6; PHAR 251, 350)
- Student communicates at least three (3) times with another health professional via phone to resolve a medication related issue (e.g. nurse, nurse practitioner, physician assistant, physician, pharmacist)
***ASSIGNMENT:** Student documents each of the three (3) interactions and describes what the issue was, who they spoke to, how the conversation went, and how the issue was resolved
 - Student demonstrates the ability to communicate with patients, caregivers and healthcare providers at an appropriate level.
***ASSIGNMENT:** Student chooses one medication encountered during the experience and types at least one (1) paragraph in which they dictate exactly what they would say to a low-literacy patient about their new prescription. The following information should be included:
 - a. Brand and generic name of the medication
 - b. Mechanism of action (in patient-friendly language)
 - c. Common side effects and appropriate warnings/precautions
 - d. Proper administration (if appropriate) and storage
 - e. Any other information that might be appropriate
- 8. Provide effective medication information to patients regarding prescription and non-prescription therapies** (Outcome 2.1, 3.6; PHAR 251, 350)
- Student performs *at least* one (1) practice counseling session with pharmacy personnel and the preceptor offers constructive feedback
 - Student utilizes the PAR (prepare, assess, respond) technique to counsel six (6) patients on either prescription and or non-prescription medications
 - Student learns about at least one (1) OTC diagnostic device and counsels one (1) patient on it (e.g. blood glucose monitor, blood pressure monitor, etc.)
- 9. Demonstrate fundamental drug information skills** (Outcome 1.1; PHAR 251, 350, 351)
- Student recognizes a time when they do not know the answer to a drug information question
 - On *at least* two (2) occasions, the student identifies which of the *available* drug information resources they can use to find the answer, researches the answer, formulates a response and provides the response to the healthcare provider or patient in a timely fashion
- 10. Discuss the role of third parties in the provision of drug therapy in the community setting** (Outcome 2.2)
- Student processes six (6) prescriptions requiring a prior authorization or another restriction related to prescription medication coverage
 - Student assists or counsels a patient or caregiver in problems related to prescription medication coverage, health insurance, government health care programs or manufacturer patient assistance programs
***ASSIGNMENT:** Student types a one-page paper on the benefits and challenges of health insurance

P4 Students
Early Practice Experience
PHAR 491 and PHAR 492

P4 Learning Objectives (PHAR 491 and PHAR 492)

Upon completion of the P4 experiences with pharmacist preceptors in **an elective setting**, the student should be able to:

1. Identify policies and mechanisms utilized by the site to improve safety (Outcome 2.2)
2. Demonstrate essential knowledge of commonly used medications (Outcome 1.1)
3. Demonstrate appropriate documentation for non-controlled and controlled substance ordering, prescription processing, and inventory management (Outcome 2.2)
4. Describe the site's management and organizational structure (Outcome 4.4)
5. Make and defend rational, ethical decisions within the context of personal and professional values (Outcome 4.4)
6. Demonstrate caring, ethical, and professional behavior when interacting with peers, professionals, patients, and caregivers (Outcome 1.1)
7. Demonstrate the ability to utilize available resources to augment drug knowledge, answer drug-related questions, and complete drug information assignments (Outcome 1.1)
8. Describe the site's management and organizational structure (Outcome 1.1)

As the site's scope of practice allows, students should also demonstrate competence in the following learning objectives:

1. Demonstrate full technical functions of prescription processing
2. Accurately and safely compound prescription medication
3. Obtain accurate and comprehensive medication histories based on patient interviews and use the information to identify drug-related problems
4. Provide effective medication information to patients regarding prescription and non-prescription therapies
5. Accurately complete basic physical assessments and counsel patients on the results
6. Describe the role of other healthcare providers in the provision of comprehensive patient care and discuss the role of the pharmacist within an interdisciplinary healthcare team

The University of Findlay College of Pharmacy P4 Year – Summer/Fall (PHAR 491) Competency Checklist

On the following pages, you will find a checklist of tasks that will help you to evaluate the student's ability to achieve the learning objectives on the previous page. These tasks are aligned with the CAPE outcomes from page 6 and are also linked to entrustable professional activities (EPAs). Use this checklist when completing a final evaluation of the student to assess not only their knowledge but your level of trust in them performing the activities. The definition of the trust levels is included in the four-point scale below and on the Experiential Competency Requirements & Student Evaluation found on CORE/ELMS.

- The student is responsible for attempting to complete ALL items listed.
- If you feel that the student may not be able to complete some of the items on the checklist, please contact the Assistant Director of Experiential Education immediately to discuss alternative options.
- Items that have an asterisk (*) next to them indicate assignments that complement items on the checklist. The student must complete these assignments at home and upload them to their professional portfolio. You may or may not choose to review these materials.

Upon conclusion of this student's rotation, you will be asked to evaluate and document achievement of the learning objectives in **RxPreceptor/CORE ELMS**. Therefore, either you or your designee must personally observe the student completing the tasks in order to adequately assess the student's competence.

You will be asked to evaluate the student using the following four-point scale:

1 = Unsatisfactory Performance (Low Trust: The student required complete guidance or was unprepared; the preceptor had to complete most of the task.)

Student does not meet requirements. Student is unable to complete the tasks despite guidance and prompting.

2 = Needs Improvement (Minimal/Moderate Trust: The student was able to perform some tasks but required repeated directions.)

Student meets some minimum requirements. Student frequently requires guidance and/or prompting to complete tasks.

3 = Progressing Satisfactorily (High Trust: The student demonstrated some independence, only requiring intermittent prompting.)

Student consistently meets requirements. Student completes basic and some complex tasks independently with minimal or no guidance and/or prompting.

4 = Exceeds Expectations (Complete Trust: The student functioned fairly independently and only needed assistance with nuances or complex situations.)

Student exceeds requirements. Student consistently and independently completes all basic and complex tasks going beyond what is required.

If you have any questions or concerns please contact the Assistant Director of Experiential Education phone: (419) 434-5783; e-mail: burkart@findlay.edu).

P4 YEAR – SUMMER/FALL (PHAR 491) COMPETENCY CHECKLIST

Students must demonstrate competence in the following learning objectives upon completion of this rotation:

- 1. Identify policies and mechanisms utilized by the site to improve safety (Outcome 2.2)**
 - Student discusses the common reasons for medication errors, where the errors commonly occur, and systems in place at the site to address or avoid errors
 - Student and preceptor discuss medication error reporting requirements at the site including what gets reported (near misses or just errors that reach the patient) and how those reports are addressed and followed up

***ASSIGNMENT:** Write a one-page paper describing best practices in place at the site that reduce the potential for medication errors

- 2. Demonstrate essential knowledge of commonly used medications (Outcome 1.1)**
 - Student correctly identifies at least fifteen (15) Top 200 medications by trade and generic name, lists their therapeutic class and can describe their mechanism of action

- 3. Demonstrate appropriate documentation for non-controlled and controlled substance ordering, prescription processing and inventory management (Outcome 2.2)**
 - Student describes the process of drug inventory management (controlled and non-controlled substances) at the site including ordering, storage, and security and control procedures

- 4. Make and defend rational, ethical decisions within the context of personal and professional values (Outcome 4.4)**
 - Student and preceptor discuss an ethical dilemma encountered during the experience (or if one is not encountered during the experience, the preceptor may describe an ethical situation they've encountered in the past)
 - Student demonstrates a willingness to form and defend an opinion on the ethical situation

***ASSIGNMENT:** Describe in writing (one-page minimum) the ethical dilemma that was discussed, the method of resolving it, and a description of how you would have handled the situation (May NOT use Plan B scenario)

- 5. Demonstrate caring, ethical, and professional behavior when interacting with peers, professionals, patients, and caregivers (Outcome 4.4)**
 - Student demonstrates professionalism when communicating with physicians, patients and colleagues

- 6. Demonstrate the ability to utilize available resources to augment drug knowledge, answer drug-related questions, and complete drug information assignments (Outcome 1.1)**
 - Student discusses one article relating to the practice of pharmacy and/or healthcare including how the article applies to the site or its patients.

***ASSIGNMENT:** Write a one-page summary of the healthcare article and the conversation including how the article applies to the site or its patients (proper citation of the article must be included)

As the site's scope of practice allows, students should also demonstrate competence in the following learning objectives:

- 7. Demonstrate full technical functions of prescription processing**
 - Student accurately reads, evaluates and assesses six (6) consecutive prescriptions for appropriate drug, dose, frequency, route of administration
 - Student reviews at least six (6) patient profiles for drug duplication, contraindications, drug interactions, drug allergies and proposes potential resolutions for any issues
 - Student assesses the urgency and risk associated with any drug-related problems
 - Student describes the process at the site for documenting the intervention and resolution of issues related to drug duplication, contraindication, drug interactions, and drug allergies
 - Student communicates with another healthcare provider to resolve medication related issue

- 8. Accurately and safely compound prescription medication**
 - Student extemporaneously compounds three medications (oral, topical, rectal, ophthalmic or parenteral preparation) pursuant to a prescription or mock prescription
 - Student documents the compound's ingredients and shows correct calculations
 - Student determines the appropriate storage of compounded medications before and after dispensing

- 9. Obtain accurate and comprehensive medication histories based on patient interviews and use the information to identify drug-related problems**
 - Interview at least three (3) patients to obtain an accurate and comprehensive medication history (including allergies and reactions, prescription medications, over-the-counter medications, herbals/natural products, dates of therapy, etc.)
 - Evaluate the collected patient information to determine the presence of a disease, medical condition, or drug-related problem(s), and assess the need for treatment and/or referral

- 10. Provide effective medication information to patients regarding prescription and non-prescription therapies**
 - Student utilizes the PAR (prepare, assess, respond) technique to counsel at least three (3) patients on either prescription and or non-prescription medications
 - Student recommends or selects nonprescription products appropriate for a given patient's symptoms or nutritional needs with consideration of potential adverse effects, appropriate dose and duration of use, potential drug-disease state or drug-drug interactions/contraindications and need for physician referral

- 11. Accurately complete basic physical assessments and counsel patients on the results**
 - Student manually assesses the pulse and respiratory rate, blood pressure and/or blood glucose of five (5) patients
 - Student explains the results of the assessment to each of the five patients

- 12. Describe the role of other healthcare providers in the provision of comprehensive patient care and discuss the role of the pharmacist within an interdisciplinary healthcare team**
 - Student participates in interdisciplinary care by observing at least one other healthcare provider (nurse, physician, physician assistant, nurse practitioner, dietician, social worker, etc.) interacting with the patient and medical team
 - Student discusses the role of the healthcare provider observed with preceptor

The University of Findlay College of Pharmacy P4 Year – Winter/Spring (PHAR 492) Competency Checklist

On the following pages, you will find a checklist of tasks that will help you to evaluate the student's ability to achieve the learning objectives on the previous page. These tasks are aligned with the CAPE outcomes from page 6 and are also linked to entrustable professional activities (EPAs). Use this checklist when completing a final evaluation of the student to assess not only their knowledge but your level of trust in them performing the activities. The definition of the trust levels is included in the four-point scale below and on the Experiential Competency Requirements & Student Evaluation found on CORE/ELMS.

- The student is responsible for attempting to complete ALL items listed.
- If you feel that the student may not be able to complete some of the items on the checklist, please contact the Assistant Director of Experiential Education immediately to discuss alternative options.
- Items that have an asterisk (*) next to them indicate assignments that complement items on the checklist. The student must complete these assignments at home and upload them to their professional portfolio. You may or may not choose to review these materials.

Upon conclusion of this student's rotation, you will be asked to evaluate and document achievement of the learning objectives in **RxPreceptor/CORE ELMS**. Therefore, either you or your designee must personally observe the student completing the tasks in order to adequately assess the student's competence.

You will be asked to evaluate the student using the following four-point scale:

1 = Unsatisfactory Performance (Low Trust: The student required complete guidance or was unprepared; the preceptor had to complete most of the task.)

Student does not meet requirements. Student is unable to complete the tasks despite guidance and prompting.

2 = Needs Improvement (Minimal/Moderate Trust: The student was able to perform some tasks but required repeated directions.)

Student meets some minimum requirements. Student frequently requires guidance and/or prompting to complete tasks.

3 = Progressing Satisfactorily (High Trust: The student demonstrated some independence, only requiring intermittent prompting.)

Student consistently meets requirements. Student completes basic and some complex tasks independently with minimal or no guidance and/or prompting.

4 = Exceeds Expectations (Complete Trust: The student functioned fairly independently and only needed assistance with nuances or complex situations.)

Student exceeds requirements. Student consistently and independently completes all basic and complex tasks going beyond what is required.

If you have any questions or concerns please contact the Assistant Director of Experiential Education by phone at (419) 434-5783 or e-mail at burkart@findlay.edu.

P4 YEAR – WINTER/SPRING (PHAR 492) COMPETENCY CHECKLIST

Students must demonstrate competence in the following learning objectives upon completion of this rotation:

1. **Identify policies and mechanisms utilized by the site to improve safety** (Outcome 2.2)
 - Student discusses the function and importance of a quality assurance and describe how quality is ensured at the practice site
 - Student performs or observes a quality assurance check
 - Student identifies the methods by which pharmacy staff are trained in the use of one or more of the following at the site:
 - Dispensing robot or other automated dispensing process
 - Automated compounding device
 - Medication cabinet (e.g. Accudose, Pyxis)
 - Smart pumps
 - Inventory management systems
 - Electronic prescribing systems
2. **Demonstrate essential knowledge of commonly used medications** (Outcome 1.1)
 - Student correctly identifies at least fifteen (15) Top 200 medications by trade and generic name, lists their therapeutic class and can describe their mechanism of action
3. **Describe the site's management and organizational structure** (Outcome 1.1)
 - Student and preceptor discuss the site's organizational chart, and the responsibilities of various staff to coworkers, patients, and the department (if applicable)
 - Student and preceptor discuss staffing patterns, requirements and scheduling at the site
4. **Demonstrate caring, ethical, and professional behavior when interacting with peers, professionals, patients, and caregivers** (Outcome 4.4)
 - Student demonstrates professionalism when communicating with physicians, patients and colleagues

***ASSIGNMENT:** Describe a situation in which you or someone at the site had to deal with a challenging patient or practitioner. Write a two page paper reflecting on the following questions:

 - How was the situation handled? Was someone right and wrong in this situation?
 - Was the outcome positive or negative, and what made it that way?
 - What are some of the potential issues that the patient/practitioner may have been dealing with, which may not have been known to the person in the pharmacy?
 - How did the situation impact the work environment of the pharmacy?
 - If you had the same situation occur again, what would you do the same or different?
5. **Demonstrate the ability to utilize available resources to augment drug knowledge, answer drug-related questions, and complete drug information assignments** (Outcome 1.1)
 - Student and preceptor discuss a current issue of *Pharmacist's Letter*, identifying and reviewing articles that are important for a pharmacist practicing at the site
 - Student and preceptor discuss various opportunities for pharmacists to participate in professional and educational activities, i.e. continuing education, staff development, professional organizations, etc.

***ASSIGNMENT:** Identify and answer one drug-related question as given by a pharmacist, patient or healthcare professional. The answer should be a minimum of a two-pages and properly referenced.

As the site's scope of practice allows, students should also demonstrate competence in the following learning objectives:

6. **Demonstrate full technical functions of prescription processing**
 - Student accurately reads, evaluates and assesses six (6) consecutive prescriptions for appropriate drug, dose, frequency, route of administration
 - Student reviews at least six (6) patient profiles for drug duplication, contraindications, drug interactions, drug allergies and proposes potential resolutions for any issues
 - Student assesses the urgency and risk associated with any drug-related problems
 - Student describes the process at the site for documenting the intervention and resolution of issues related to drug duplication, contraindication, drug interactions, and drug allergies
 - Student communicates with another healthcare provider to resolve medication related issue

7. **Accurately and safely compound prescription medication**
 - Student extemporaneously compounds three medications (oral, topical, rectal, ophthalmic or parenteral preparation) pursuant to a prescription or mock prescription
 - Student documents the compound's ingredients and shows correct calculations
 - Student determines the appropriate storage of compounded medications before and after dispensing

8. **Obtain accurate and comprehensive medication histories based on patient interviews and use the information to identify drug-related problems**
 - Interview at least three (3) patients to obtain an accurate and comprehensive medication history (including allergies and reactions, prescription medications, over-the-counter medications, herbals/natural products, dates of therapy, etc.)
 - Evaluate the collected patient information to determine the presence of a disease, medical condition, or drug-related problem(s), and assess the need for treatment and/or referral

9. **Provide effective medication information to patients regarding prescription and non-prescription therapies**
 - a. Student utilizes the PAR (prepare, assess, respond) technique to counsel at least three (3) patients on either prescription and or non-prescription medications
 - b. Student recommends or selects nonprescription products appropriate for a given patient's symptoms or nutritional needs with consideration of potential adverse effects, appropriate dose and duration of use, potential drug-disease state or drug-drug interactions/contraindications and need for physician referral

10. **Accurately complete basic physical assessments and counsel patients on the results**
 - Student manually assesses the pulse and respiratory rate, blood pressure and/or blood glucose of five (5) patients
 - Student explains the results of the assessment to each of the five patients

11. **Describe the role of other healthcare providers in the provision of comprehensive patient care and discuss the role of the pharmacist within an interdisciplinary healthcare team**
 - Student participates in interdisciplinary care by observing at least one other healthcare provider (nurse, physician, physician assistant, nurse practitioner, dietician, social worker, etc.) interacting with the patient and medical team
 - Student discusses the role of the health care provider observed with preceptor

P5 Students
Intermediate Practice Experience
PHAR 591 and PHAR 592

P5 LEARNING OBJECTIVES (PHAR 591 and PHAR 592)

Upon completion of the P5 experiences with the pharmacist practitioner in the institutional pharmacy setting, the student should be able to:

1. Accurately process medication orders in an institutional pharmacy (Outcome 2.2)
2. Accurately and safely compound intravenous admixtures (Outcome 2.2)
3. Identify policies and mechanisms utilized by the site to improve safety (Outcome 2.2)
4. Identify patient information from a patient's medical record (Outcome 2.1)
5. Demonstrate essential knowledge of commonly used medications in the institutional setting (Outcome 1.1)
6. Compose an accurate SOAP note that includes a prioritize assessment of the patient's problems as well as patient-specific data (Outcomes 2.1 and 3.1)
7. Identify and reconcile drug-related problems (Outcome 3.1)
8. Discuss the changes in pharmacokinetic parameters that occur in certain disease states and adjust medication doses based on pharmacokinetic changes (Outcome 2.1)
9. Describe the responsibilities of the pharmacist when handling controlled substances in the inpatient setting (Outcome 2.2)
10. Demonstrate caring, ethical, and professional behavior when interacting with peers, professionals, patients, and caregivers (Outcome 4.4)
11. Discuss the roles and responsibilities of pharmacists, other healthcare providers, staff, and administration in the institutional setting (Outcome 1.1)
12. Demonstrate effective communication skills (verbal, non-verbal, and written) at an appropriate level for patients, caregivers, health care providers and the general public (Outcome 3.6)
13. Use effective written, visual, verbal, and nonverbal communication skills to provide patient/caregiver education (Outcome 3.6)
14. Demonstrates the ability to utilize available drug information resources to augment drug knowledge, answer drug-related questions, and complete drug information assignments (Outcome 1.1)
15. Describe how health care informatics is utilized by the site to improve efficiency and safety (Outcome 2.2)

The University of Findlay College of Pharmacy P5 Year – Summer/Fall (PHAR 591) Competency Checklist

On the following pages, you will find a checklist of tasks that will help you to evaluate the student's ability to achieve the learning objectives on the previous page. These tasks are aligned with the CAPE outcomes from page 6 and are also linked to entrustable professional activities (EPAs). Use this checklist when completing a final evaluation of the student to assess not only their knowledge but your level of trust in them performing the activities. The definition of the trust levels is included in the four-point scale below and on the Experiential Competency Requirements & Student Evaluation found on CORE/ELMS.

- The student is responsible for attempting to complete ALL items listed.
- If you feel that the student may not be able to complete some of the items on the checklist, please contact the Assistant Director of Experiential Education immediately to discuss alternative options.
- Items that have an asterisk (*) next to them indicate assignments that complement items on the checklist. The student must complete these assignments at home and upload them to their professional portfolio. You may or may not choose to review these materials.

Upon conclusion of this student's rotation, you will be asked to evaluate and document achievement of the learning objectives in **RxPreceptor/CORE ELMS**. Therefore, either you or your designee must personally observe the student completing the tasks in order to adequately assess the student's competence.

You will be asked to evaluate the student using the following four-point scale:

1 = Unsatisfactory Performance (Low Trust: The student required complete guidance or was unprepared; the preceptor had to complete most of the task.)

Student does not meet requirements. Student is unable to complete the tasks despite guidance and prompting.

2 = Needs Improvement (Minimal/Moderate Trust: The student was able to perform some tasks but required repeated directions.)

Student meets some minimum requirements. Student frequently requires guidance and/or prompting to complete tasks.

3 = Progressing Satisfactorily (High Trust: The student demonstrated some independence, only requiring intermittent prompting.)

Student consistently meets requirements. Student completes basic and some complex tasks independently with minimal or no guidance and/or prompting.

4 = Exceeds Expectations (Complete Trust: The student functioned fairly independently and only needed assistance with nuances or complex situations.)

Student exceeds requirements. Student consistently and independently completes all basic and complex tasks going beyond what is required.

If you have any questions or concerns please contact the Assistant Director of Experiential Education by phone at (419) 434-5783 or e-mail at burkart@findlay.edu.

P5 YEAR – SUMMER/FALL (PHAR 591) COMPETENCY CHECKLIST

1. **Accurately process medication orders in an institutional pharmacy** (Outcome 2.2)
 - Student receives and appropriately interprets ten (10) written or electronic medication orders
 - Student receives and interprets six (6) written intravenous admixture orders
 - Student describes the process for prioritizing medication orders at site (e.g. STAT, now, on call, routine, PRN orders)
 - Student identifies and reviews six (6) standard order sets at institution
 - Student describes the process for dispensing unit dose medications
 - Student describes the process for dispensing intravenous admixtures

2. **Accurately and safely compound intravenous admixtures** (Outcomes 2.2)
 - Student describes the importance of USP 797 guidelines
 - Student demonstrates the appropriate method for personal cleansing and garbing before entering the clean room and the appropriate method for cleaning the hood
 - Student properly calculates the expiration date and time for six (6) intravenous admixture
 - Student performs the calculations required for six (6) intravenous admixtures and if possible, compounds the admixtures using appropriate aseptic technique for each product.

3. **Identify policies and mechanisms utilized by the site to improve safety** (Outcome 2.2)
 - Student discusses the common reasons for medication errors, where the errors commonly occur, and systems in place to address or avoid errors.
 - Student and preceptor discuss The Joint Commission's National Patient Safety Goals and policies at the site that comply with the safety goals
 - Student identifies at least two (2) initiatives at the site that minimize medication errors during transition of care.

4. **Identify patient information from a patient's medical record** (Outcome 2.1)
 - Student reviews six (6) patient charts and identifies the following items:
 - Patient demographic information, medication profile, lab results, progress notes
 - Student calculates ideal body weight, body mass index and creatinine clearance for each patient

5. **Demonstrate essential knowledge of commonly used medications in the institutional setting** (Outcome 1.1)
 - Student correctly identifies at least fifteen (15) medications by trade and generic name, lists their therapeutic class and can describe their mechanism of action
 - ***ASSIGNMENT:** Student identifies the target drug concentrations for Narrow Therapeutic index drugs: digoxin, lithium, phenytoin, theophylline, warfarin
 - ***ASSIGNMENT:** Student documents six (6) drug therapy interventions made by a pharmacist, and describes the rationale for the changes

6. **Compose an accurate original SOAP note from patients encountered at the site that includes a prioritize assessment of the patient's problems as well as patient-specific data** (Outcomes 2.1 and 3.1)
 - ***ASSIGNMENT:** Student completes two (2) SOAP notes. Choose any two *different* topics from among the following:
 - Cardiovascular Disorders
 - Renal Diseases
 - Respiratory Diseases
 - Immunology or Connective Tissue Disorders
 - See the "Student Guidelines for SOAP Notes" on page 42 for further details on expectations and format. The student must obtain feedback from the preceptor and adjust the SOAP note BEFORE uploading this assignment to MyCred (student review with preceptor/preceptor initial or sign cases).

7. **Identify and reconcile drug-related problems** (Outcome 3.1)
 - Student identifies at least two (2) drug-related problems on medication orders and makes a recommendation for the resolution of the problem
 - Student resolves two (2) medication related issues by phone or in person with a prescriber

8. **Discuss the changes in pharmacokinetic parameters that occur in certain disease states and adjust medication doses based on pharmacokinetic changes** (Outcome 2.1)
 - ***ASSIGNMENT:** Student determines the pharmacokinetic changes that occur in specific patients under the following conditions:
 - Half-life in a renal failure patient
 - Volume of distribution in a heart failure patient
 - Clearance in a geriatric patient

9. **Describe the responsibilities of the pharmacist when handling controlled substances in the inpatient setting** (Outcome 2.2)
 - Student accurately fills or describes the process of filling controlled substance floor stock.
 - Student describes the difference between the processes for drug ordering, check-in, returns, and credit/charging for control and non-controlled medication.

10. **Demonstrate caring, ethical, and professional behavior when interacting with peers, professionals, patients, and caregivers** (Outcome 4.4)
 - Student and preceptor discuss an ethical situation that occurred at the site (either in the past or the present) and the student describes how they would handle the situation
 - Student demonstrates professionalism when communicating with physicians, patients and colleagues

11. **Discuss the roles and responsibilities of pharmacists, other healthcare providers, staff and administration in the institutional setting** (Outcome 1.1)
 - Student describes the role of other healthcare workers in the provision of patient care and services. The student should discuss healthcare workers including (but not limited to) the following: Physicians, physician assistants, nurses (LPN/RN/NP), dieticians, OT/PT, and respiratory therapists
 - Student participates in interdisciplinary care by observing at least one other healthcare provider (nurse, physician, physician assistant, nurse practitioner, dietician, social worker, etc.) interacting with the patient and medical team
 - Student discusses the role of the health care provider observed with preceptor

12. **Demonstrate effective communication skills (verbal, non-verbal, and written) at an appropriate level for patients, caregivers, health care providers and the general public** (Outcome 3.6)
 - Student takes six (6) calls from a physician or nurse regarding a question or clarification of a medication order

13. **Use effective written, visual, verbal, and nonverbal communication skills to provide patient/caregiver education** (Outcome 3.6)
 - Student performs discharge counseling for at least three (3) patients OR discusses a medication therapy change directly with a patient or caregiver at least three (3) times

14. **Demonstrates the ability to utilize available drug information resources to augment drug knowledge, answer drug-related questions, and complete drug information assignments** (Outcome 1.1)
 - Student identifies at least six (6) drug information sources available to the practice site
 - Student identifies IV compatibility for at least six (6) combinations of intravenous admixtures
 - ***ASSIGNMENT:** Student completes one journal club discussion with the preceptor

The University of Findlay College of Pharmacy P5 Year – Winter/Spring (PHAR 592) Competency Checklist

On the following pages, you will find a checklist of tasks that will help you to evaluate the student's ability to achieve the learning objectives on the previous page. These tasks are aligned with the CAPE outcomes from page 6 and are also linked to entrustable professional activities (EPAs). Use this checklist when completing a final evaluation of the student to assess not only their knowledge but your level of trust in them performing the activities. The definition of the trust levels is included in the four-point scale below and on the Experiential Competency Requirements & Student Evaluation found on CORE/ELMS.

- The student is responsible for attempting to complete ALL items listed.
- If you feel that the student may not be able to complete some of the items on the checklist, please contact the Assistant Director of Experiential Education immediately to discuss alternative options.
- Items that have an asterisk (*) next to them indicate assignments that complement items on the checklist. The student must complete these assignments at home and upload them to their professional portfolio. You may or may not choose to review these materials.

Upon conclusion of this student's rotation, you will be asked to evaluate and document achievement of the learning objectives in **RxPreceptor/CORE ELMS**. Therefore, either you or your designee must personally observe the student completing the tasks in order to adequately assess the student's competence.

You will be asked to evaluate the student using the following four-point scale:

1 = Unsatisfactory Performance (Low Trust: The student required complete guidance or was unprepared; the preceptor had to complete most of the task.)

Student does not meet requirements. Student is unable to complete the tasks despite guidance and prompting.

2 = Needs Improvement (Minimal/Moderate Trust: The student was able to perform some tasks but required repeated directions.)

Student meets some minimum requirements. Student frequently requires guidance and/or prompting to complete tasks.

3 = Progressing Satisfactorily (High Trust: The student demonstrated some independence, only requiring intermittent prompting.)

Student consistently meets requirements. Student completes basic and some complex tasks independently with minimal or no guidance and/or prompting.

4 = Exceeds Expectations (Complete Trust: The student functioned fairly independently and only needed assistance with nuances or complex situations.)

Student exceeds requirements. Student consistently and independently completes all basic and complex tasks going beyond what is required.

If you have any questions or concerns please contact the Assistant Director of Experiential Education by phone at (419) 434-5783 or e-mail at burkart@findlay.edu.

P5 YEAR – WINTER/SPRING (PHAR 592) COMPETENCY CHECKLIST

1. **Accurately process medication orders in an institutional pharmacy** (Outcome 2.2)
 - Student receives and appropriately interprets ten (10) written or electronic medication orders
 - Student receives and interprets six (6) written intravenous admixture orders
 - Student receives and interprets six (6) written intravenous admixture orders
 - Student accurately calculates doses for any given drug
 - Student reviews a medical administration records (MAR) and describes the purpose and usefulness of the MAR and identifies standard administration times at institution

2. **Accurately and safely compound intravenous admixtures** (Outcome 2.2)
 - Student demonstrates the appropriate method for personal cleansing and garbing before entering the clean room and the appropriate method for cleaning the hood
 - Student properly calculates the expiration date and time for six (6) intravenous admixture
 - Student performs the calculations required for six (6) intravenous admixtures and if possible, compounds the admixtures using appropriate aseptic technique for each product.
 - Student describes process for order and preparation of TPN admixtures and chemotherapy products, and if possible, demonstrates appropriate compounding technique for preparing these products
 - Student checks an emergency cart or drug kit for contents and expiration dating

3. **Identify policies and mechanisms utilized by the site to improve safety** (Outcome 2.2)
 - Student describes the process for medication reconciliation at site
 - Student describes the process for adverse event reporting at the site and documents at least one (1) adverse drug reaction using this process
 - Student discusses the membership and function of the Pharmacy and Therapeutics Committee and the Institutional Review Board
 - Student describes the purpose and benefits of the Medication Use Evaluation (MUE) process from the perspective of the physician/provider, patient, and pharmacist

4. **Describe how health care informatics is utilized by the site to improve efficiency and safety** (Outcome 2.2)
 - Student identifies the methods by which pharmacy staff are trained in the use of one or more of the following at the site:
 - Dispensing robot or other automated dispensing process
 - Automated compounding device
 - Medication cabinet (e.g. Accudose, Pyxis)
 - Smart pumps
 - Inventory management systems
 - Electronic prescribing systems
 - Student performs a quality assurance check or on at least one of the items listed above or identifies how to generate and utilize reports.
 - Student describes how the site is using technology to dispense medication and improve patient safety

5. **Demonstrate essential knowledge of commonly used medications in the institutional setting** (Outcome 1.1)
 - Student correctly identifies the spectrum and indications for commonly used antibiotics
 - Student correctly describes the mechanism(s) of common drug interactions.

***ASSIGNMENT:** Student documents six (6) drug therapy interventions made by a pharmacist, and describes the rationale for the changes

6. **Compose an accurate original SOAP note that from patients encountered at the site that includes a prioritize assessment of the patient's problems as well as patient-specific data** (Outcomes 2.1 and 3.1)
***ASSIGNMENT:** Student completes two (2) SOAP notes. Choose any two *different* topics from among the following:
- Gastrointestinal Disorders
 - Endocrinology Disorders
 - Neurologic Diseases
 - Infectious Diseases
- See the "Student Guidelines for SOAP Notes" on page 42 for further details on expectations and format. The student must obtain feedback from the preceptor and adjust the SOAP note BEFORE uploading this assignment to MyCred (student review with preceptor/preceptor initial or sign cases).
7. **Identify and reconcile drug-related problems** (Outcome 3.1)
- Student identifies at least two (2) drug-related problems on medication orders and makes a recommendation for the resolution of the problem
 - Student resolves two (2) medication related issues by phone or in person with a prescriber
8. **Discuss the changes in pharmacokinetic parameters that occur in certain disease states and adjust medication doses based on pharmacokinetic changes** (Outcome 2.1)
***ASSIGNMENT:** Student determines the correct dose for three (3) of the listed drugs in a specific patient and provides a description of the calculation and/or rationale for dose recommendation as well as appropriate monitoring parameters. The drugs are:
- Warfarin, phenytoin, gentamicin, tobramycin, theophylline, digoxin, and/or vancomycin
9. **Demonstrate caring, ethical, and professional behavior when interacting with peers, professionals, patients, and caregivers** (Outcome 2.2)
- Student demonstrates professionalism when communicating with physicians, patients and colleagues
- *ASSIGNMENT:** Student uploads completed the IPPE Interprofessional Education (IPE) Evaluation Form with Preceptor comments/feedback (form found in CORE Elms/RxPreceptor)
10. **Discuss the roles and responsibilities of pharmacists, other healthcare providers, staff, and administration in the institutional setting** (Outcome 4.4)
- Student and preceptor discuss the site's organizational chart, and the responsibilities of various staff to coworkers, patients, and the department, and other department
 - Student and preceptor discuss staffing patterns, requirements and scheduling at the site
 - Student and preceptor discuss the role of the pharmacy directors and managers in the operation of an institutional pharmacy
11. **Demonstrate effective communication skills (verbal, non-verbal, and written) at an appropriate level for patients, caregivers, health care providers and the general public** (Outcome 3.6)
***ASSIGNMENT:** Student gives a topic presentation (at least 10 minutes long) on a topic assigned by the preceptor. See the "Topic Presentation Guidelines" and the "Topic Presentation Evaluation" form on pages 44 and 45 for further instructions.
12. **Use effective written, visual, verbal, and nonverbal communication skills to provide patient/caregiver education** (Outcome 3.6)
- Student performs discharge counseling for at least three (3) patients OR discusses a medication therapy change directly with a patient or caregiver at least three (3) times.
13. **Demonstrates the ability to utilize available drug information resources to augment drug knowledge, answer drug-related questions, and complete drug information assignments** (Outcome 1.1)
***ASSIGNMENT:** Student identifies and answers one drug-related question as given by a pharmacist, patient or healthcare professional. Answer should be a minimum of a two-page referenced answer.

SOAP Note Guidelines

Use SOAP (subjective, objective, assessment, plan) note format to document your patient case. You will need to incorporate a pharmacy focused plan into your note. Choose a case in which the assigned topic (cardiovascular disease, infectious disease, endocrinology disorder, or gastrointestinal disorder) is the MAIN or MOST CRITICAL problem. You will write up the subjective, objective, and assessment for the entire patient, but you will only include a plan for the most critical problem.

I. Subjective Information:

This information is obtained from the patient and/or caregiver and so is not directly observed or measured by the SOAP writer. This information is descriptive and cannot be confirmed by diagnostic test or procedures. The following items should be reviewed and considered when available, the specific examples under each item listed are not all inclusive, but instead should be used as a guide in writing your case.

- **Chief Complaint** (layperson's terms of why the patient is seeking medical advice)
- **HPI** (history of present illness)
 - Date of onset
 - Precise location
 - Nature of onset, severity and duration
 - Presence of exacerbations and remissions
 - Effect of any treatment given
 - Relationship to other symptoms, bodily functions, or activities
 - Degree of interference with daily activities
- **PMH** (past medical history)
 - Serious illnesses
 - Surgical procedures
 - Injuries that patient has experienced
 - Minor complaints only if they are applicable
- **FMH** (family medical history)
- **SH** (social history)
 - Social & environmental factors that may contribute to the development of disease. (The following may be considered: marital status, number of children, educational background, occupation, physical activity, dietary habits, alcohol/tobacco/recreational drug use)
- **Medications** (This information can be provided by patient or caregiver. *If the information is confirmed via medical records or pharmacy records, it should be moved to the objective section*)
 - Should include prescription medications, OTCs, and herbal or alternative therapies
 - Include the drug name, dose, route, frequency, and duration of therapy
- **Allergies**
 - Include the allergy and the patient's reaction (if known)
- **ROS** (review of systems)
 - In this section the examiner will ask questions to the patient about each body system. For the purpose of this assignment only the positive and negative findings are recorded. The ROS serves to evaluate each body system and to prevent the omission of pertinent information. Information that was not noted in the HPI should be noted in this section.

II. Objective Information:

This information is detailed data that is obtained and recorded by the examiner or another health care provider. Items that are commonly listed here include:

- Vital Signs
- Height/Weight/BMI
- Cardiac Findings
- Chest
- HEENT
- Extremities: (e.g. 2+ bilateral pedal edema)
- Neurologic Findings
- Radiographic Findings
- Labs
- Medications (if confirmed by medical or pharmacy records)

III. Assessment:

Identify, prioritize, and characterize the real or potential drug therapy problems using a patient-focused approach. You should have one assessment statement for each problem identified. The assessment statement should include:

- The status of the problem, if applicable (e.g. mild/moderate/severe, chronic/acute, controlled/uncontrolled, etc.)
- The problem itself
- The evidence that confirms your assessment
- The current therapy
- For example:
 - Uncontrolled type 2 diabetes as evidenced by A1c of 8.3% and average fasting blood glucose of 230 mg/dL despite daily therapy with metformin 1000mg BID and glimepiride 4mg daily.

You MUST **prioritize** your patient's problems. The most critical problem should be listed first and the least critical (or those problems which are currently under control) should be listed last. **It is expected that you will assess all problem areas.**

IV. Plan:

Develop an optimal individualized pharmacotherapy plan for only the **FIRST PROBLEM YOU ASSESSED** (you do NOT have to create a plan for every problem you assessed) using the guidelines below:

1. Goal – clearly outline at least one SMART (Specific, Measurable, Action-oriented, Relevant, and Time-bound) goal for the problem
2. Pharmacologic Plan - Select a drug, dosage form, dose, schedule and duration of therapy that is best for your patient.
 - a. Consider allergies, economic, psychosocial, and ethical factors that are applicable to the patient.
 - b. Describe the reason for drug therapy selection. Document evidence based practice guidelines and/or drug references.
3. Non-Pharmacologic Plan – List non-drug related recommendations
4. Monitoring and Follow-Up - Include a plan for monitoring the safety and efficacy of the interventions including *when* monitoring and follow-up should occur
5. Patient Education - include an outline of the education you would provide to the patient or caregiver on this new plan

Topic Presentation Guidelines

This activity is intended to give students an opportunity to go through the steps required to prepare and present a topic presentation. In addition, it will give them practice with their presentation skills.

Audience:

The presentation may be presented to just the preceptor or may be given to other healthcare professionals

Style:

The presentation may be informal (handout only) or formal (PowerPoint presentation, with or without handouts)

Length:

The presentation must be *at least* 10 minutes long. The preceptor may choose to have the student give a longer presentation if desired

Feedback:

An evaluation form can be found on the following page. This evaluation form is optional.

Topic Ideas:

The preceptor may assign any pharmacy-related topic. However, several suggestions have been made below to help ease the selection of a topic if desired.

- Disease State (this could focus on diagnosis, staging, and/or treatment as the preceptor and student deem appropriate)
 - Pneumonia
 - CHF
 - COPD (acute exacerbation)
 - Atrial Fibrillation
 - Others...
- Drug-specific presentation
 - Choose a drug encountered during IPPEs
 - New drug
 - Discuss indication, side effects, warning/precautions, administration issues, etc.
 - Evaluate the primary literature related to its approval and form an opinion on the drug's role
- Other topic ideas:
 - Treatment of heparin-induced thrombocytopenia
 - Treatment of diabetic ketoacidosis
 - Causes of hyponatremia or hypernatremia
 - New vaccine issues
 - Topics related to pharmacy law or pharmacy administration

Topic Presentation Evaluation

Please evaluate the student's presentation using the following scale:

- 1 Improvement Mandatory** (the student is substantially below performance expectation, remediation needed)
- 2 Below Expectations**
- 3 Meets Expectations**
- 4 Exceeds Expectations**
- 5 Superior** (the student significantly exceeds expectations and is performing at an APPE level or beyond)

Student Name: _____

Topic: _____

Presentation Style

Comments

Student appeared self-assured (good eye contact, limited use of notes) **1 2 3 4 5**

Pace of delivery was appropriate **1 2 3 4 5**

Volume and tone were appropriate **1 2 3 4 5**

Student did not have distracting mannerisms **1 2 3 4 5**

Student did not use pause words (such as "um" and "like") **1 2 3 4 5**

Organization and Time

Comments

Presentation was an appropriate length and time was used appropriately **1 2 3 4 5**

Visual materials were organized, neat, and free of spelling and grammar errors **1 2 3 4 5**

The information was organized logically **1 2 3 4 5**

Content

Comments

Background information was accurate and pertinent **1 2 3 4 5**

Appropriate drug information resources were consulted and referenced **1 2 3 4 5**

Questions were handled appropriately **1 2 3 4 5**

It is clear the student knows the topic well **1 2 3 4 5**

Final comments:

Preceptor-Specific Resources and Guidelines

Preceptor Expectations

- The preceptor should be aware that his/her relationship with the student is one of student-teacher rather than employer-employee, or coworkers.
- The student-teacher relationship must be built on mutual respect, trust, communication, and understanding.
- The preceptor is responsible for the professional and legal supervision of the student during the experience.
- The preceptor should instill in the student the principles of professional ethics.
- The student should be given a thorough orientation to the site early in the rotation to facilitate a smooth transition into the site and optimize the use of available resources.
- The preceptor should explain to the student his/her expectations, particularly in the areas of dress, conduct, scheduling of hours, and general characteristics of practice.
- The preceptor should afford the student the time and patience needed for an optimal learning experience.
- The preceptor should not assume the student's level of competence but should determine it by reviewing the student's profile, discussing previous experience with the student, and observing performance of basic skills.
- The preceptor should expose the student to all aspects of practice consistent with the student's ability, needs, and interests as determined by the preceptor and guided by the course syllabi.
- The preceptor, in consultation with the student, should establish a mutually-agreeable schedule of student activities for the rotation. If the schedule includes experiences with other practitioners, the preceptor should clearly communicate with these individuals and arrange for introductions, and time and place to meet.
- Criticism should be constructive and conveyed to the student privately whenever possible.
- The preceptor should familiarize all personnel with the experiential program objectives to avoid misunderstanding and confusion about the student's role during the rotation.
- The preceptor shall complete the evaluation materials required by the College in an accurate and objective manner. The preceptor shall review each evaluation with the student.

Using RxPreceptor/CORE ELMS for IPPEs

RxPreceptor/CORE ELMS is the online reporting and monitoring tool used by the University of Findlay College of Pharmacy to track and facilitate the experiential education program.

You will use RxPreceptor/CORE ELMS to:

- Confirm student hours
- Confirm successful completion of student competency checklists
- Evaluate student's professional development
- Review student evaluations of you
- Track student absences, tardiness, or report incidents to the Experiential Office
- Track preceptor training

To use RxPreceptor:

1. Go to <https://www.corehighered.com/> and click "LOGINS" in the upper right-hand corner and select "ELMS Login."
2. Enter your username and password in the areas indicated. If you do not know your username and password, you can contact Pam Cochran at 419-434-5633 or cochranp@findlay.edu.

ELMS

Username

Password

Sign in

[Forgot Your Password?](#)

3. Verification of IPPE Hours

Preceptors are expected to confirm student hours. On the left side of the screen, click on "**Hours Tracking**." You can verify the date and time that your student has spent with you. IPPE students are to log their hours daily and should be verified by the preceptor by the end of the experience. The University of Findlay experiential faculty will review the student's submission after the preceptor has confirmed all hours.

4. Completing Evaluation of the Student

Preceptors are expected to evaluate the student. On the left side of the screen, click on "**Evaluations**" then the sub tab "**Evaluation of Student**." Find the student's name and click on the link to the right of the student's name. This will bring up the evaluation form which must be completed. You can work and "Save as Draft Copy" this document but when it is complete **you must click the "Submit Final Score"** tab at the bottom of the evaluation.

5. Accessing Evaluations

Students are required to complete an evaluation of their preceptor within 24 hours of concluding their experience. An outline of the evaluation students complete can be found on page 60 of the IPPE Preceptor manual. This evaluation can be accessed only **after** the preceptor has submitted their evaluation of the student. To access and view this evaluation, click on "**Evaluations**" on the left side of the screen then click on the sub tab "**Evaluation of Preceptor.**"

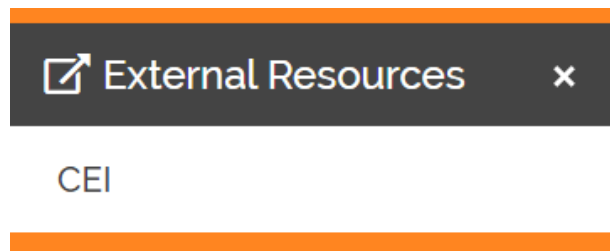

6. Incident Tracking/Student Absence Tracking

Incident reporting and absence tracking can be used to track student absences, tardiness, professionalism issues, or any other concerning situation that arises during IPPE rotations. On the left side of the screen, click on "**Student Absences**" or "**Student Incidents,**" respectively. You may choose to report the incident or absence through RxPreceptor/CORE ELMS's reporting mechanism, or you may contact Tim Burkart directly at burkart@findlay.edu or by phone at (419) 434-5783.

7. Preceptor Training

We encourage preceptor education and offer training through the Connect. Educate. Impact (CEI) program. All University of Findlay preceptors can access CEI through their CORE/ELMS account.

To access the training module, log into your CORE/ELMS account. At the bottom of the left-hand, orange column, click on External Resources. A bolded CEI tab will appear; click on this to access the instructions and access code for CEI.

At the bottom of the screen which appears, you'll enter in your NAPB e-Profile ID, and then click on the gray Update NABP icon.

YOUR CEI ACCESS CODE ID: FINDLAY19

Please enter your **NABP** e-Profile Id:

Update NABP

This action will take you to the CEI log-in page where you will enter the CEI Access Code ID, listed above. Once logged in, you'll find several free CE courses when you click on the Preceptor Catalog.

Any time you complete preceptor training (on campus, at a national meeting, via CEI or even through another college's experiential program), please document this under the "**My Requirements**" tab found on the left side of the CORE/ELMS screen. Scroll down to the folder titled "**Level I – University of Findlay Preceptor.**" Click "**Edit**" next to "**Preceptor Training Program**" and in the comment box, note the type of preceptor training you have completed and the date. (Please leave the expiration date field blank). Then click the "**Status**" radio button that says "**Complete.**" Then hit "**Enter Requirement.**" If you gain additional training at a later date, simply add the additional training and dates to the comment box. This is on the honor system, and we do not require you to send us a copy of your CE.

Checklist for Orienting Students

GENERAL ORIENTATION:

- What should the student call you?
- What name does the student prefer to be called?
- Where should the student store their belongings?
- Where should the student park?
- Does the student need a badge?
- Policy on breaks/meals, if applicable (Can the student purchase a meal on site? If not, is the student permitted to leave the site to purchase a meal? Where can they eat a meal they pack for themselves?)
- What is your policy on cell phones/handheld devices as drug information references?
- Discuss site-specific policies and procedures. Are there policies that go above and beyond the UF absence/tardiness policy, dress code, patient confidentiality policy, etc.? If so, please outline your policies for the student.
- Orient the student to the computer/telephone system and your expectation of student responsibilities in regards to these technologies.

STUDENT-SPECIFIC ORIENTATION:

- Review the student's Competency Requirements for the semester to discuss how and when competencies will be met during the rotation.
- Review the student's "Student Introduction" (the student should have this filled out ahead of time).
 - What are the student's previous pharmacy experiences (both paid employment and experiential rotations)?
 - What courses is the student taking right now and what topics are being covered? (Is there a way you can reinforce the topics the student is learning about in your pharmacy setting?)
 - What are the student's goals for the rotation?
 - Are they reasonable goals for the experience you can provide at your site? Please discuss why or why not.
- Do you have any site-specific learning objectives, expectations, or goals for the student? Please share this with the student.
- Establish a schedule for the remainder of the rotation (a schedule is provided in the IPPE manual). The student should sign this schedule to confirm and commit to the days discussed. Please make a copy for the student and keep a copy for yourself.

University of Findlay College of Pharmacy Curriculum

The following is the suggested outline for the UF Pharmacy program. Not all students follow this exact path, but it is meant as a guide. Please use this to get better idea of where your IPPE students are within the curriculum.

Fall	Hours	Spring	Hours
Pharmacy First Year			
*CHEM 130 Advanced General Chemistry I	3	CHEM 131 Advanced General Chemistry II	3

Creating Site-Specific Objectives

Preceptors are strongly encouraged to develop site-specific learning objectives. The learning objectives for University of Findlay students are specifically designed to give an overview of community and institutional pharmacy practice, but we understand that many sites do not fit the mold of a traditional “community” or “institutional” pharmacy practice site. Please consider creating a few site-specific learning objectives and/or activities you would like students to complete.

When creating objectives, it can be hard to decide where to begin. Bloom's Taxonomy is a tool used by educators to help create objectives designed to address different levels of cognitive complexity. Feel free to use this as a guide to help you in creating learning objectives.

Action Verbs

Depending on the level of cognition you would like your student to achieve, choose an action verb to start off your learning objective. Keep in mind that your students will be in their first, second, or third professional years of pharmacy school.

Remembering	Understanding	Applying	Analyzing	Evaluating	Creating
Define	Classify	Choose	Appraise	Appraise	Assemble
Duplicate	Describe	Demonstrate	Compare	Argue	Construct
List	Discuss	Employ	Contrast	Defend	Design
Memorize	Explain	Illustrate	Criticize	Judge	Develop
Reproduce	Identify	Interpret	Differentiate	Select	Formulate
Repeat	Locate	Operate	Discriminate	Support	Write
	Recognize	Schedule	Distinguish	Value	
	Report	Solve	Examine	Evaluate	
	Select	Use	Question		
	Translate		Test		
	Paraphrase				

Student Evaluation of Preceptor & Site

The following form will be completed by your student at the end of each experience. To maintain objectivity in grading, **you will not be able to see the student's evaluation of you until you have completed the student's evaluation** (additionally, the student will not be able to see your evaluation of them until this form is complete). Once both evaluations are complete, you will be granted access to review the student's evaluation of you on RxPreceptor/CORE ELMS.

Please evaluate the preceptor and site according to the following scale: 4 = Exceeds Standards, 3 = Meets Standards, 2 = Partially Meets Standards, 1 = Does Not Meet Standards

Preceptor Quality	Evaluation	Comments
The preceptor explained what was expected of you and any site-specific requirements prior to starting the experience.	4 3 2 1	
The preceptor provided regular feedback on the quality of your work throughout the experience.	4 3 2 1	
The preceptor was a positive healthcare role model to both you and the patients.	4 3 2 1	
The preceptor was knowledgeable in his or her area of expertise.	4 3 2 1	
The preceptor communicated to you in a professional and appropriate manner.	4 3 2 1	
Site Quality	Evaluation	Comments
The site provided sufficient opportunity for me to meet all the UF course specific objectives.	4 3 2 1	
The site provided sufficient opportunity for me to meet all of the site-specific objectives. (Those above and beyond UF objectives)	4 3 2 1	
The resources were adequate to complete the rotation.	4 3 2 1	
The site promoted an environment conducive for independent and guided learning.	4 3 2 1	

Preceptor Strengths:

Areas where the Preceptor could improve:

Site Strengths:

Areas where the Site could improve (please be specific):

Trouble-shooting

Call the Experiential Office! We are here to help and would be happy to help guide you through **any** situation you are dealing with. We commonly help with the following issues by providing strategies for working with and developing students with:

- Gaps in their knowledge-base
- Communication difficulties
- Professionalism issues

It may be that you will not be able to address the student's issues during their IPPE rotation with you, BUT we still want to know if you have concerns. If you are concerned about a student, please let us know. We will meet with the student to address areas of concern and work with them to help address those issues. We find that students who have issues on IPPEs also struggle in other areas and are more likely to struggle during APPEs and beyond. We strongly believe that the students are better off if issues are identified early so they know what to work on in order to become a successful pharmacist.

For any issues you encounter with IPPE student, please contact:

Tim Burkart, Pharm.D., BCPS, BCGP, CDP
Assistant Director of Experiential Education

Appendix A: Bloodborne Pathogens Exposure Procedure

Background:

Bloodborne pathogens are infectious microorganisms present in blood that can cause disease in humans. These pathogens include, but are not limited to, hepatitis B virus (HBV), hepatitis C virus (HCV), and human immunodeficiency virus (HIV), the virus that causes AIDS. Student and Health Care Providers (HCP) exposed to blood borne pathogens are at risk for serious or life-threatening illnesses. All healthcare providers and students should use appropriate practices for handling and disposing of contaminated sharps or specimens. In the event an exposure does occur, the following should be followed:

Purpose:

To establish a clear set of directives in the event a student or faculty/staff member is exposed to a possible blood borne pathogen (BBP) and to provide the proper precautions and steps to be carried out if exposure to any BBP occurs to any student or faculty/staff member.

Procedure:

1. Treat Exposure Site

- a. The student or faculty/staff member should take immediate action to clean the affected area following any needle stick, injury, or other incident that causes the student or faculty/staff member to be exposed to a source patient's blood or other body fluid.
 - i. Skin exposures
 1. The area should be washed thoroughly with soap and water
 2. Wounds or punctures may be cleaned with an antiseptic such as an alcohol-based hand hygiene agent
 - ii. Mucosal surfaces (mouth, nose and eye exposure)
 1. These areas should be flushed with large amounts of water or normal saline for at least 10 minutes
- b. Follow the site's policy, if applicable, to obtain care as soon as possible
 - i. Employee or student to seek medical attention within the first hour of exposure of potential BBP

2. Report and Document Exposure

- a. Inform clinic supervisor of the incident immediately as well as the University of Findlay Experiential Director
- b. Source to complete the "Source Individual Consent Form" (pg. 57)
 - i. This can be performed by clinic supervisor or other qualified HCP
- c. Source to have testing at site (if hospital) or other medical facility agreed upon
- d. The following information should be documented regarding the recipient and incident using the "Bloodborne Pathogen Exposure Documentation" form (pgs. 58-59):
 - i. Date and time of exposure
 - ii. Details of the procedure being performed, including where and how the procedure was performed

- iii. Details of the exposure, including the type and amount of fluid or material and the severity of the exposure
- iv. Details about the infection status of the source (i.e. HIV positive, hepatitis B, hepatitis C, or unknown.
 - A note should also state if the source status is unknown
- v. Details about the recipient's health including: hepatitis B vaccination response status, medical conditions, allergies, pregnancy or breastfeeding etc.
- e. Faculty /Staff must provide documentation of any counseling, post-exposure management and follow-up to The University.

3. Determine Need for Post exposure Prophylaxis (PEP)

This will be determined by your medical provider as he or she will have the most up-to-date information regarding the following:

- a. The need for PEP is determined by the type of injury and the status of the recipient
 - i. Type of exposure
 - 1. Percutaneous injury
 - 2. Mucous membrane exposure
 - 3. Non-intact skin exposure
 - 4. Bites resulting in blood exposure to either person involved
 - ii. Type and amount of fluid/tissue
 - 1. Blood
 - 2. Fluids containing blood
 - 3. Potentially infectious fluid or tissue (semen; vaginal secretions; and cerebrospinal, synovial, pleural, peritoneal, pericardial, and amniotic fluids)
 - 4. Direct contact with concentrated virus
 - iii. Infectious status of source
 - 1. Presence of HBsAg
 - 2. Presence of HCV antibody
 - 3. Presence of HIV antibody
 - 4. In the instance of an unknown source, evaluate the likelihood of exposure to a source at high risk for infection. Collect information about where and under what circumstances the exposure occurred to be assessed epidemiologically for the likelihood of transmission of HBV, HCV, or HIV.
 - iv. Susceptibility of exposed person
 - 1. Hepatitis B vaccine and vaccine response status
 - 2. HBV, HCV, and HIV immune status
 - v. If any party is unsure whether to start PEP or not, they may call the PEpline for up-to-the-minute advice on managing occupational exposures to bloodborne pathogens at 888-448-4911.

- b. According to the CDC, HBIG, hepatitis B vaccine and HIV PEP are most likely to be effective if administered as soon after the exposure as possible.
 - i. HBIG – within 24 hours
 - ii. HBV vaccine – within 24 hours
 - 1. Can be administered simultaneously with HBIG at different site
 - iii. HIV PEP
 - 1. The interval within which PEP should be initiated for optimal efficacy is not known.
 - 2. Animal studies suggest that PEP is less effective when started more than 72 hours after exposure; however, the interval after which no benefit is gained from PEP in humans is undefined. Therefore, PEP should be started even if the interval since exposure exceeds 72 hours.
 - 3. Exact regimens and recommendations for disease- specific PEP management are provided by the CDC and are available at <http://www.cdc.gov/niosh/topics/bbp/>

4. Financial Responsibility

- a. When a student is exposed to a potentially infectious agent during the course of regular educational activities for the University, the University will not be responsible for costs incurred by the student for treatment and follow-up of this exposure.
- b. The “source” testing will be paid for by the college.
- c. Any personal financial obligation incurred by an exposure is the student's responsibility.

Please refer to the most current information located on the Center for Disease Control and Prevention website: <http://www.cdc.gov/niosh/topics/bbp/guidelines.html>.

Source Individual's Consent Form

HIV, HBV, and HCV Testing

The University of Findlay – College of Pharmacy

The "Source Individual" is the person whose blood or body fluids were exposed to the healthcare provider/student.

Source Individual's Information

Name (please print): _____

Address: _____

Telephone Number: _____

Exposure Date: _____

Source Individual's Statement of Understanding

I understand that employers/sites are required by law to attempt to obtain consent for HIV, HBV, and HCV testing each time an employee or student is exposed to the blood or bodily fluids of any individual. I understand that a University of Findlay employee or student has been accidentally exposed to my blood or bodily fluids and that testing for HIV, HBV, and HCV is requested. I am not required to give my consent, but in doing so I am allowing the healthcare provider to receive proper preventative care. I recognize my blood will be tested for these viruses at no expense to me.

I understand that the results of these tests will be kept confidential and will only be released to medical personnel directly responsible for my care and treatment, to the exposed healthcare provider for his or her medical benefit only, and to others only as required by law.

Please INITIAL next to the appropriate line:

I hereby **consent** to:

HIV Testing _____

HBV Testing _____

HCV Testing _____

I hereby **refuse consent** to:

HIV Testing _____

HBV Testing _____

HCV Testing _____

Source Individual's signature: _____

Legal guardian name (please print): _____

If source is under 18 years of age

Legal guardian signature: _____

If source is under 18 years of age

Date: _____

Name of Medical Facility/ER where the source individual will receive testing:

Contact information of testing site: _____

Bloodborne Pathogen Exposure Documentation

University of Findlay – College of Pharmacy

The recipient is the employee or student exposed to a potential bloodborne pathogen. The source is the person whose blood or body fluids were exposed to the healthcare provider/student.

Recipient Information

Name: _____

UF Department or Program: _____

Recipient Health Information

Hepatitis B vaccination response status: _____

Current medical conditions: _____

Allergies: _____

Incident Information

Date of Exposure: _____

Time of Exposure: _____

Detail of procedure being performed at the time of exposure (including where and how the procedure was performed): _____

Type (blood, plasma, etc.) and amount (in mL) of fluid or material exposed: _____

Area exposed (skin, eyes, mucosal, etc.): _____

Severity of exposure: _____

Provide a brief description what occurred: _____

Treatment Information

- For Skin Exposure:

Was the site thoroughly washed with soap and water? Circle one: Yes / No

Were wounds and punctures cleaned with an antiseptic agent? Circle one: Yes / No

- For Mucosal Exposure:

Was the site flushed with water for at least 10 minutes? Circle one: Yes / No

- Did the recipient receive medical attention within the first hour of exposure?

Circle one: Yes / No

If no, please describe why not and when medical attention was obtained and where it was obtained: _____

If yes, please describe when and where medical attention was obtained: _____

Testing

Did the source know details of their infection status (HIV, HCV, HBV)? Circle one: Yes / No

If yes, what was the status? _____

Was the source asked for testing? Circle one: Yes / No

If so, did they consent to testing? Circle one: Yes / No

If not, why was the source not asked for testing? _____

Where did the source individual seek medical attention? _____

Exposed/injured Individual's signature: _____ Date: _____

UF Supervisor's signature: _____ Date: _____
